

# Chinese Multi-function Military Shovel WJQ-308

## Specifications

### General Introduction

Chinese Multi-function Military Shovel is mainly featured as a military shovel with various other functions. It was invented by a serviceman, who capitalized on his experiences. The inventor engaged in two actual combats, got wounded twice and was awarded eight times. Base on his combined experience of combat and training as well as his in-depth research on military & civil shovel, he added more than ten combat functions to a military shovel which can greatly avail the troops under field conditions when they are in battles or drills.

### State graph of China Multifunction shovel

### Function 1

Compare to ordinary shovel, military shovel How so short, What should we do with? I'll show you. Kneel

on one leg, right leg bent, legs straight, right hand holding the fingers grip, the right thumb pressure on the wooden handle at the top, left hand holding Grip Department, work with two hands. According to this method, it can play up to the

best function.

Making soil. You always put both hands shovel; break beat of their own will actually own work.

### Function 2

In order to improve the function of the shovel, designers prepared for you a great power machetes. It not only can cut trees, bamboo, but also can cut wire, cable (wood handle is insulated. If you are interested in cooking, you can also cut meat and vegetables, and even do sliced noodles. you never need to worry about its effect, its special structure and material was confirmed after the 108 trials .

### Function 3

Dig and pat soil is the responsibility of the military shovel. Measuring the height, the depth of holes, cutting a fuse is also a piece of cake

### Function 4

It's so easy to dig soil, you can dig soil from each direction To help clean up soil for the Soldier in the rear. It is also very simple to make a small hole, a

cat-hole.

### Function 5

You must be familiar about pickaxe and Trowel. You must be familiar about pickaxe and Trowel. As long as locate the position by the instructions, you can dig, hack, and even do Relay remove soil

### Function 6

Climb the high tree and building is so difficult. If you can find a rope or wire rope and shovel co-rotating with Mongolia afterburner, lock the target with shovel on the Trunk, climbing the high building and getting into the window is also a piece of cake. It is also a good help when climbing the steep cliff or dig a pit.

### Function 7

As the hook pulled something, it can help you hold the wire or chemicals and other items which inconvenient to touch.

you should make full use of it.

**Function 8**

shear steel wire with standing is only one way to do it, image whether is it also convenient when you are you are squatting, kneeling, lying .

**Function 9**

posture according to the figure is appropriate for bulk shear, other posture also can work, you need to have a try.

**Function 10**

Both Double-stranded clamp and cross-clamp can be done, the only thing you do is to rotate the wood handle with your hands.

**Function 11**

Fixed detonator fuse is a very professional thing. Non-Professional required Consulting. In addition to this, you can fix anything by your own wishes.

**Function 12**

Cutting off the nylon or iron on the box isn't an easy thing. it can be done easily with fixed position, the top on the ground, holed the wooden

handle with hands , side skid edge to move forward according to the instruction.

**Function 13**

You can open up the metal packing of Ammunition box, bucket, tin cans and so on

**Function 14**

This figure show you how to pull out a nail

**Function 15**

The function of hammer you'll get as long as you see it.

**Function 16**

It is difficult to cut off the iron wire on the wooden blocks and boxes, Pliers can't get into it and shear will slip, many tools cannot work. But with multifunction field shovel, you can cut off easily with 7 Carded into the iron wire, hold the wooden handle, and shake right and left a few times.

**Function 17**

Folding-shaped military shovel, known as the "hand shield", combined offense and defense, it is the evolved version of Chinese weapon "dang". It is very

useful for self-protect in an s Narrow space such as cab, offices and so on. You can take up it easily for protect yourself from all direction attack, Maximum to protect your head, shoulders, chest and other parts of body, it also can attack at the right time.

**Attentions:**

1. Clean wiping before storage after using; oil inunctions to avoid rust if a long time storage is required
